History

You can make it but you can't change it. To get in the record books you must be willing to put in the unconditional commitment and effort that's needed to be the best. The result is nothing less than perfection. Our commitment to engineering, quality and detail has earned us 147 World and 121 USA titles. And in the process, we've earned something even more impressive: a reputation. Renthal, We Build Championships.

TWINWALL®

THE WORLD'S STRONGEST AND SAFEST HANDLEBAR. Renthal's revolutionary Twinwall® handlebar is the world's strongest motocross handlebar produced. An oversized diameter, 1-1/8" (28.6mm) handlebar which utilises two tubes, one within the other, borrows principles from aircraft design and gives the Twinwall® the best combination of strength, lightweight and safety. By utilising two tubes throughout the handlebar, we are effectively increasing the wall thickness in the most highly stressed areas of the handlebar which increases its fatigue life.

Ultra high strength inner tube is hard anodised to resist wear from twist grip and throttle

Outer tube has extreme resistance to mechanical damage and is anodised to prevent corrosion

Renthal's copyrighted bonded lightweight single bolt, clamp and brace system

Knurled grip area increases bonding between bars and grips

TWINWALL®

BAR MOUNTS

1-1-8" HANDLEBAR MOUNTS. These bar mounts are CNC Machined from 6082 T6 billet aluminium and black anodized with laser etched Renthal logo. The mounting bolts are a special CNC machined hardened nickel Chromoly steel with a machined relief to allow for bending of the bolt in the event of a hard fall. 1-1/8" mounts are meant to be a replacement for the stock 7/8" handlebar mounts and replicate the OEM bar position and height. They allow for the fitment of an oversized 1 1/8" handlebar such as the Twinwall or Fatbar on a motorcycle which came with 7/8" handlebars originally. Made to utilize the OEM rubber cones, replacement bolts available separately. Sold in pairs.

FATBAR®

TANIUM

1-1/8" BRACELESS HANDLEBAR. The Renthal Fatbar® features a tapered outer wall resulting in a 1-1/8" (28.6mm) clamping diameter and 7/8" diameter at control ends. This profiled wall and brace-less design combines excellent strength with good flexibility. KTM and Suzuki have chosen the Renthal Fatbar® as the ultimate brace-less handlebar and have fit them as original equipment where this design is preferred within their range of motocross models.

RED

THE ORIGINAL 7/8" (22.2mm) DIAMETER HANDLEBAR. First introduced in 1969 as an upgrade to the stock steel handlebars which came on the off-road motorcycles of that era, the Renthal 7/8" (22.2mm) aluminium handlebar revolutionized the industry with far superior materials and innovative design. Our alloy handlebars offered more strength, more flex, more vibration dampening and improved rider comfort. Renthal aluminium handlebars quickly became the industry standard for decades to come. The highest quality materials, engineering and craftsmanship have allowed Renthal 7/8" handlebars to win more championships than any other handlebar in the world. At our UK manufacturing facility, we are constantly seeking more advanced materials and manufacturing methods which has resulted in a handlebar that is 20% stronger than any other 7/8" handlebar made. Renthal 7/8" handlebars have come as standard equipment on Honda's CR and CRF motocross bikes since 2004 and on Kawasaki's KX and KX-F motocross bikes since 2006.

CHAINWHEELS

THE #1 CHAINWHEEL IN MOTOCROSS & SUPERCROSS. Renthal Ultralight™ Chainwheels are chosen by more Factory Motocross and Supercross teams than any other brand on the market. Our rear chainwheels are CNC machined to offer the greatest concentricity and optimum tooth profile for increased life and durability. Through the CNC machining process, we are able to create an extremely lightweight rear chainwheel which reduces revolving unsprung weight and increases the power transfer to the rear wheel.

FRONT CHAINWHEELS

THE FINEST FRONT CHAINWHEELS. Rental front chainwheels are chosen by more Factory Motocross and Supercross teams than any other on the market. Case hardened and core refined 655M13 Nickel Chrome Molybdenum steel and precision CNC machined to extremely tight tolerances for maximum longevity. Certain models available in a computer aided Ultralight™ design to minimize weight and allows maximum power transfer to the real wheel.

ULTRALIGHT™

STANDARD

TWINRING™

STEEL AND ALUMINIUM COMPOSITE REAR CHAINWHEEL. Renthal's Twinring™ chainwheel is the longest lasting most durable chainwheel you can buy—developed over five years of extensive testing. The Renthal Twinring™ combines a specially enhanced 7075 T6 aluminium alloy centre and an ultra high strength electroless nickel coated steel outer ring. By combining these two materials we have created a chainwheel that is lighter than steel but more durable than the traditional all aluminium chainwheel. The unique flat face design keeps weight to a minimum and prevents fouling on the chain guide.

The logo for Twinring, featuring the word "TWINRING" in a bold, red, sans-serif font with a white outline. A white swoosh underline is positioned below the letters, and a small white circle is placed above the letter "I".

TWINRING™

MX/OFF-ROAD

THE PERFECT MATCH FOR RENTHAL CHAINWHEELS. Renthal chain is only available in the highest grade possible. The best materials and manufacturing processes are used to offer the ultimate chain in each category, perfectly matched with Renthal chainwheels for maximum efficiency and longevity.

R1 WORKS CHAIN. A premium high strength 520 chain with excellent impact load resistance, designed specifically to withstand the stress found in off road applications. This chain is the choice where a combination of high strength, lightweight and maximum power transfer are important considerations.

R3-2 O-RING CHAIN. A premium high strength sealed ring chain with excellent impact load resistance designed specifically to withstand the stress found in off-road applications where an o-ring chain is desired. This chain is the choice where a combination of high strength, lightweight and maximum power transfer are important considerations. The nitrile o-rings help extend chain life by retaining the special vacuum injected grease near the critical pin area.

CHAIN

FINAL DRIVE KIT. The Renthal final drive kit is offered as a convenient way to purchase a Renthal chain and front and rear chainwheel all packaged together. We only offer these kits for selected markets throughout the world so check with the distributor for your country for availability. In North America we offer two 428 conversion kits for the Honda CRF150F and CRF230F which both come fitted with a 520 drivetrain and steel rear sprockets. By converting these models over to a 428 drivetrain with our ultralight alloy rear sprocket, the weight savings is significant and improves the transfer of power to the rear wheel and acceleration.

KEVLAR® GRIPS—THE MOST ADVANCED GRIP AVAILABLE. Renthal is the first and only manufacturer to offer a motocross grip with the added benefits of Kevlar® moulded in. This specially reinforced grip with Kevlar® resin particles offers a very soft feeling grip, but also a very long wearing grip. It lasts more than 3 times longer than our standard soft grip. The base material contains millions of randomly aligned Kevlar® resin particles, which, as the grip wears through use, more and more of are exposed at the grip surface.

DUAL COMPOUND—SOFT AND DURABLE. Rental dual compound grips combine the durability of Rental firm compound grips with the feel and vibration absorption qualities of Rental soft grips. A firm compound is used for the flange, inner sleeve and outer end of the grip for maximum durability. A soft compound is used for the outer layer of the grip which is in direct contact with the palm, fingers and thumb for improved feel.

DUAL COMPOUND

TAPERED DUAL COMPOUND

TAPERED DUAL COMPOUND GRIPS.

The Tapered Grip breaks new ground in ergonomics for MX riders. In addition to all the benefits of our standard dual compound grip, the tapered grip features an oversized thumb diameter which tapers down to our regular size at the ends. This tapered fit more closely mirrors the contours of a closed fist to offer maximum comfort and reduced rider fatigue. Because of its slightly larger diameter, this grip is also good for those with larger hands.

SINGLE COMPOUND GRIPS.

Rental single compound grips have been used by more motocross and off-road champions throughout the world than any other grip for over 20 years. Available in 3 different patterns and 3 different advanced rubber compounds from soft, medium to firm, there is a grip to suit every need. Each grip offers a different level of strength, tackiness and shock absorption to suit a variety of riding conditions and individual style.

INTELLILEVER™

THE FIRST TRULY UNBREAKABLE LEVER.

The Intellilever™ is the first truly unbreakable lever. Utilising a revolutionary design, the lever can move 90° upwards, 90° downwards and 90° forwards and all angles in between in the event of a crash. It is the only lever on the market which has this ability and makes broken or bent levers a thing of the past. The spring and cable system can be adjusted to offer different levels of resistance for dislocation and the adjustable reach allows each rider to personalise the fit.

INTELLILEVER

UNBREAKABLE FRONT BRAKE

LEVER. Manufactured using the same principles as our clutch lever, the Intellilever™ brake lever is able to pivot 90° both up and down as well as 90° forward and all angles in between in the event of a crash preventing the lever blade from breaking. The brake lever is used with the OE master cylinder and offers similar reach adjustment to the stock lever.

RC-1 BRAKE PADS

SINTERED BRAKING TECHNOLOGY. Renthal RC-1 Works Brake Pads are a premium high performance sintered metal brake pad with excellent wet and dry braking power. Designed specifically for motocross and off-road racing applications, they are the first choice where maximum stopping power, progressive feel, no brake fade and quick bed in time are important considerations.

SPORTBIKE

HARD ANODISED ALUMINIUM FOR INCREASED LONGEVITY. Renthal Ultralight road and road race rear chainwheels are manufactured from a specially enhanced high strength 7075 T6 aluminium alloy to give a good combination of strength and weight reduction. The chainwheels are CNC machined which ensures a perfect fit and concentricity and hard anodised for increased wear resistance. Hard anodizing is an integral surface coating which significantly increases the hardness and wear resistance of the chainwheel surface.

FRONT CHAINWHEELS. Renthal sportbike chainwheels are case hardened and core refined 655M13 Nickel Chrome Molybdenum steel and precision CNC machined to extremely tight tolerances for maximum longevity. Most models available in a computer aided Ultralight™ design to minimise weight and allows maximum power transfer to the real wheel.

CHAINWHEELS

SPORTBIKE GRIPS WITH KEVLAR® BRAND RESIN. Renthal is the first and only manufacturer to offer a road grip with the added benefits of Kevlar® moulded in. This specially reinforced grip with Kevlar® resin particles offers a very soft feeling grip, but also a very long wearing grip. This grip will last more than 3 times longer than our standard soft grip. The base material contains millions of randomly aligned Kevlar® resin particles, which, as the grip wears through use, more and more of are exposed at the grip surface.

SPORTBIKE GRIPS

DUAL COMPOUND SPORTBIKE GRIPS. Renthal dual compound road grips combine the durability of Renthal firm compound grips with the feel and vibration absorption qualities of Renthal soft grips. A firm compound is used for the flange, inner sleeve and outer end of the grip for maximum durability. A soft compound is used for the outer layer of the grip which is in direct contact with the palm, fingers and thumb for improved feel.

SINGLE COMPOUND SPORTBIKE GRIPS.

Available in 3 different advanced rubber compounds from soft, medium to firm. Each grip offers a different level of tackiness to suit a variety of riding conditions and individual style.

SPORTBIKE CLIP-ONS. Renthal sportbike clip-ons are a premium race spec part that was developed with the help of the Kawasaki World Superbike Racing Team. Machined from billet aluminium, each set comes complete with bar tubes made from the same 7010 aluminium as Renthal's legendary motocross handlebars. The bar tubes and the clamp are laser etched with a positioning grid for precise handlebar set up.

SPORTBIKE CLIP-ONS

*FIVE HOLE
DESIGN*

DUCATI CHAINWHEEL CARRIER. The Renthal Ducati chainwheel carrier is a direct bolt on replacement for the one piece OEM carrier/sprocket and allows for easy rear sprocket changes without removal of the rear wheel. Additionally it is CNC machined from 6082 T6 aluminium which is 66% lighter than steel which reduces revolving un-sprung weight. When used in conjunction with the Renthal hard anodised chainwheel the weight saving is just over one pound, which will provide greater transfer of power to the rear wheel.

*SIX HOLE
DESIGN*

DUCATI CARRIER

SPORTBIKE

ROAD CHAIN AND ROAD RACE CHAIN. Renthal's R4 road and RR4 Road Race chains are specially developed sealed ring chains utilizing Renthal's Self Regulating Seal (SRS) technology to increase the service life of the chain in road and road racing applications. The special SRS ring is pre-loaded during assembly creating a spring effect. As the chain wears, conventional o-rings and x-rings lose their seal, however the SRS ring has the ability to unload itself during use keeping a tighter seal against the side plates. This offers increased longevity as the specially formulated grease remains trapped around the critical pin and bushing area longer, while also keeping dirt, water and other contaminants out.

R4 SRS™ ROAD CHAIN. A premium high strength road chain, with excellent durability designed to replace your OE chain. The R4 chain is available in 520, 525 and 530 chain pitch.

RR4 SRS™ ROAD CHAIN. A highly specialized lightweight 520 sealed ring chain developed exclusively for superbike racing applications where a combination of lightweight and durability are a must. This chain utilizes Renthal's Self Regulating Seal (SRS™) technology to increase service life in racing applications.
